The following is an examiner's statement of reasons for allowance: The claims are drawn to a novel 9-nitrocamptothecin crystal form having differential scanning calorimetry and no observable endotherm and an exotherm between 273.6 and 275.6 degrees Celsius. The prior art uses tetrahydrofuran as an intermediate solvent but does not use the compound for direct crystallization as recited in the instant claims. The crystals are unique and novel over the prior art and maintain their form in pharmaceutical formulations. For these reasons the claims are held inventive over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
